

Let's find your size!

Print the page with your shoe size.

Stand on the size guide with your heel at the back to test the length.

Please note: Standing inside the rubber sole is not an accurate way to find your size.

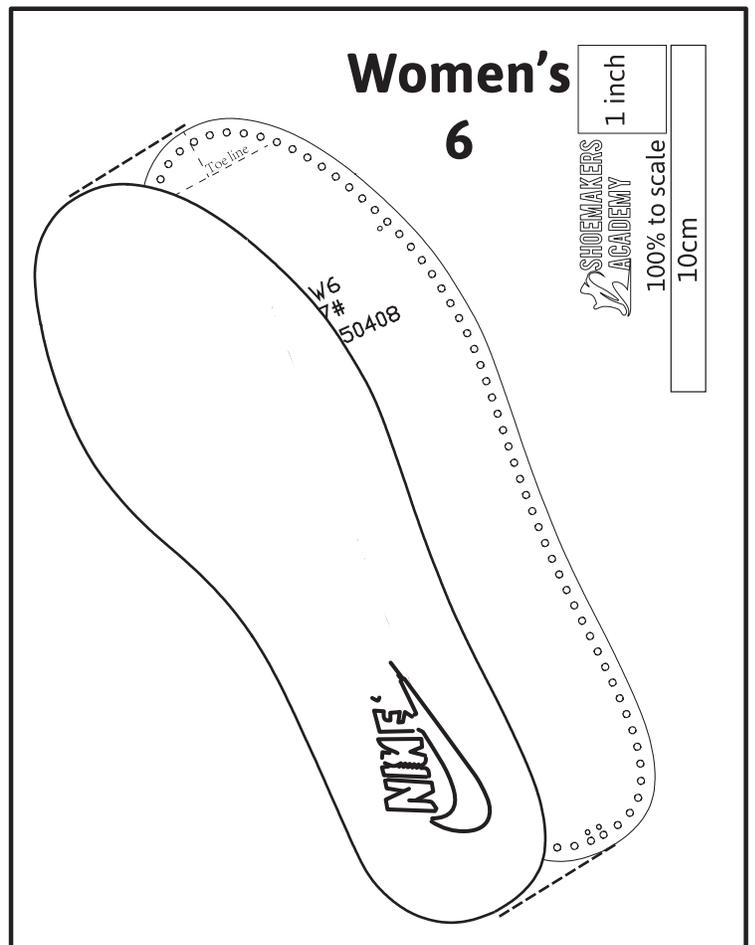

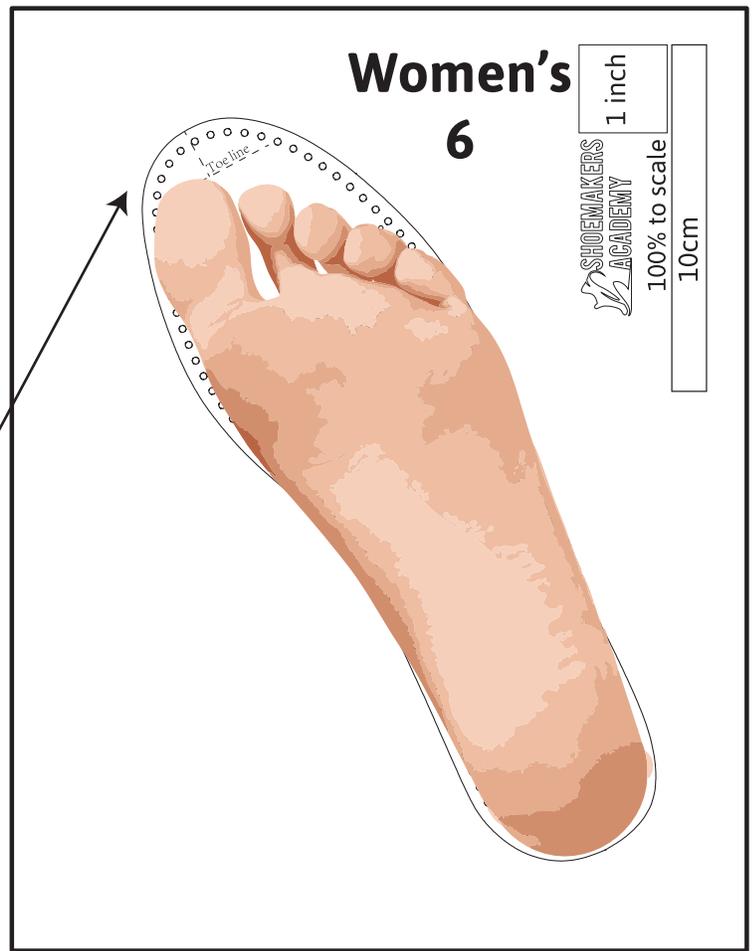

Your toes should have some extra space (about 1/4"), and be just up to the toe line.

Check out our video to help find your size.

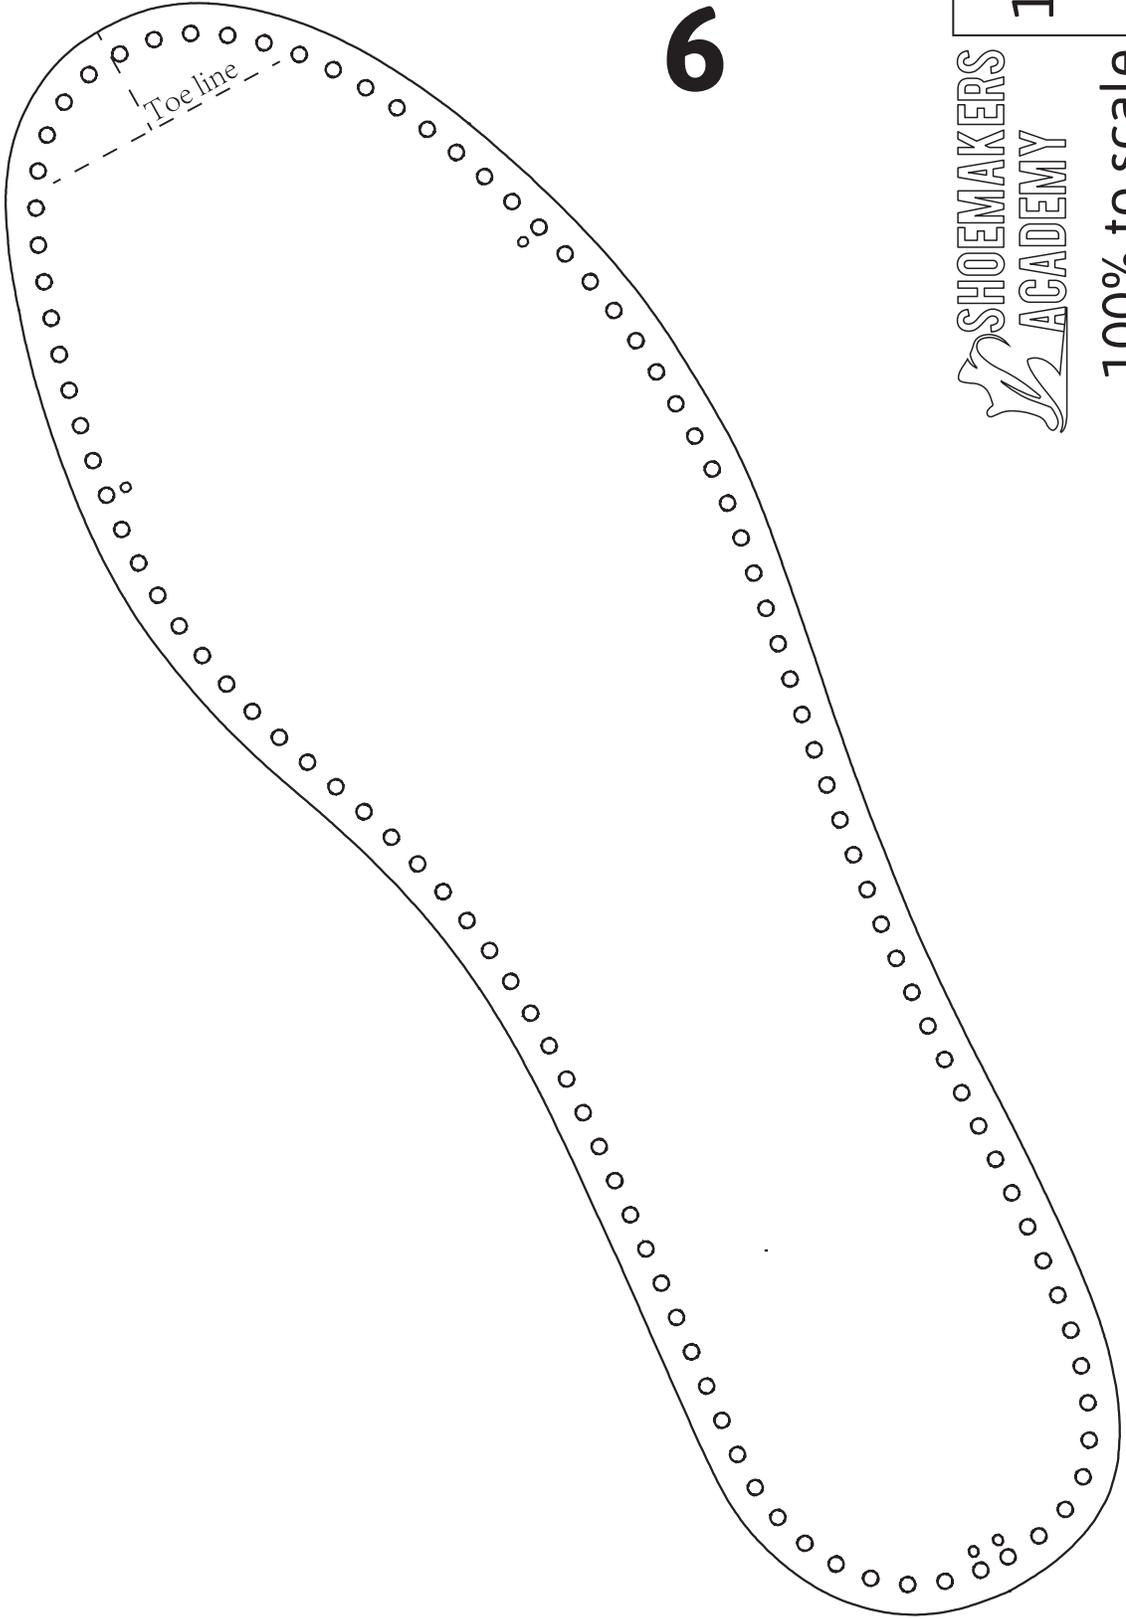

Diy Shoemaking Tutorial Video

Or, try this method to find your size: Remove the insole of your favorite shoe and compare the length.
